

# Julia Rosner

I'm a product designer who builds clear interfaces for complex, data-heavy systems, as well as engaging experiences for fans to connect over the things they love. I blend data literacy and user empathy to drive measurable growth—specializing in onboarding, activation loops, and scalable design systems.

## Warner Music Group

### Product designer

Apr 24 – Feb 26

- Shipped a new onboarding flow for the Songkick app (~460K MAUs), doubling Day 7 retention and driving significant uplifts in metrics connected to four activation criteria
- Doubled a key engagement metric (7% to 15%) by identifying and executing a strategy of low-effort, high-impact component-level changes while working with limited engineering resource
- Advocated for and eventually ran a series of activation-focused growth experiments on web, resulting in a 29pp uplift in a core metric
- Led the evolution and cross-platform adoption (Native/RN/Web) of a unified design system, resulting in an estimated 40% uplift in engineering efficiency
- Leveraged prototyping and strategic storytelling to align senior cross-functional leadership on high-impact design decisions around activation and retention
- Ran regular Continuous Discovery research calls with users, gathering insights and sharing them with the team
- Designed core flows (incl. onboarding, blocking, saving posts) for a 0→1 superfan app project
- Contributed to artist- and artist team-facing tooling and dashboards

## After Digital • *later*: Culture Suite

*Context: In Dec 23, After Digital merged with the CMS company Peppered to form Culture Suite.*

### UX Designer

May 21 – Apr 24

- Led the end-to-end design for several major European and international cultural venues, shipping optimized marketing sites and purchase paths focused on conversion and ease, while also meeting WCAG AA accessibility guidelines
  - Redesigned the primary checkout and booking flows for The Roundhouse and The Old Vic, solving complexity around seat maps, membership and room booking journeys
- Partnered on the product strategy for the Culture Suite merger, translating bespoke client requirements into a unified, scalable architecture to transition the business from agency to a revenue-generating SaaS platform.

### Junior UX Designer

Nov 19 – May 21

## Education

University of Glasgow

B.A. in Digital Media & Information  
Studies and History of Art

## Skills & methodologies

- User journey mapping, quantitative data analysis, user research and testing, design advocacy, storytelling, design systems, designing for accessibility
- Growth loops, A/B testing and experimentation
- Figma proficiency, advanced prototyping, front-end coding skills, AI-assisted coding and prototyping (Claude Code, Cursor, Figma Make)
- Fluent in English and German
